

NOTE: The structures of the Main and Supplementary papers are the same; the only difference is the marks for **Questions 4 and 5**

2026 Mid-Year (Main) Examination Scope

Total Marks: 100

Duration: 3 hours

Question 1 10 marks

T/F on the ff:

1. Integrative programming
2. OOP
3. Design patterns
4. Data exchange
5. Intersystem communication (Distributed applications)

Question 2 15 marks

Briefly answer/fill blank/matching

1. Integrative programming
2. OOP
3. Design patterns
4. Data exchange
5. Intersystem communication (Distributed applications)

Question 3 20 marks

OOP (inheritance, abstract classes, interface, etc.)

1. UML structures (brief answer)
2. What's wrong with code (briefly answer)
3. Valid/Invalid statements

Programming questions (writing parts of code) on the ff:

Question 4 13 marks

Design patterns (Factory or DAO)

Write code (including complete missing parts)

Question 5 27 marks

Data exchange

1. Write code (including complete missing parts)
 - a. XML
 - b. DTD
 - c. XSL

Question 5 15 marks

Intersystem communication: RMI

Write code (including missing parts). **Note:** know the difference between client-side and server side applications)

Total Marks: 100

Duration: 3 hours

Question 1 10 marks

T/F on the ff:

6. Integrative programming
7. OOP
8. Design patterns
9. Data exchange
10. Intersystem communication (Distributed applications)

Question 2 15 marks

Briefly answer/fill blank/matching

6. Integrative programming
7. OOP
8. Design patterns
9. Data exchange
10. Intersystem communication (Distributed applications)

Question 3 20 marks

OOP (inheritance, abstract classes, interface, etc.)

4. UML structures (brief answer)
5. What's wrong with code (briefly answer)
6. Valid/Invalid statements

Programming questions (writing parts of code) on the ff:

Question 4 15 marks

Design patterns (Factory or DAO)

Write code (including complete missing parts)

Question 5 25 marks

Data exchange

2. Write code (including complete missing parts)
 - a. XML
 - b. DTD
 - c. XSL

Question 5 15 marks

Intersystem communication: RMI

Write code (including missing parts). **Note:** know the difference between client-side and server side applications)
