Dear Colleagues:

Currently, the global digital transformation is accelerating, and data analysis has become a core competitiveness across various industries. In response to China's "Vocational Education Going Global" strategy, to promote the international application of independent software technology standards, and to facilitate the cultivation of digital skills talent in Belt and Road countries and the broader SCO region, the Chongqing Dianjiang County Vocational Education Center has jointly launched this international skills training program on "Data Analysis and Visualization" with Chongqing Hanhai RuiZhi Big Data Technology Co., Ltd. and WPS Office Software Co., Ltd.

It adopts a full English teaching mode with professional simultaneous interpretation support to ensure that trainees not only master internationally recognized data analysis methods but also skillfully utilize China's proprietary software tools to complete practical tasks. Those who complete the training and pass the assessment will receive an electronic certificate of completion, adding international credential endorsement to their career development.

We cordially invite members from overseas partner institutions to enroll in the inaugural training program.
