

- LO1:** Identify the characteristics and components of academic research
- LO2:** Analyse research problems in various IT fields
- LO3:** Evaluate research activities for ethical/unethical conduct
- LO4:** Identifying different sources of information
- LO5:** Evaluate the quality/reliability of different sources
- LO6:** Apply referencing styles in the acknowledgement of sources
- LO7:** Evaluate different research strategies
- LO8:** Evaluate different sampling methods for specific research scenarios
- LO9:** Evaluate different data collection methods for specific research scenarios
- LO10:** Evaluate different data analysis methods for specific research scenarios

QUESTION 1: MULTIPLE-CHOICE [30]

1. Answer: LO1: C [2]
2. Answer: LO2: D [2]
3. Answer: LO3: A [2]
4. Answer: LO4: A [2]
5. Answer: LO5: C [2]
6. Answer: LO6: C [2]
7. Answer: LO7: A [2]
8. Answer: LO7: A [2]
9. Answer: LO8: A [2]
10. Answer: LO8: C [2]
11. Answer, LO9: C [2]
12. Answer, LO9: D [2]
13. Answer, LO10: A [2]
14. Answer, LO10: B [2]
15. Answer, LO9: D [2]

QUESTION 2: TRUE/FALSE [20]

1. Answer, LO1: False: B [2]
2. Answer, LO2: True: A [2]
3. Answer, LO3: True: A [2]
4. Answer, LO4: False: B [2]
5. Answer, LO5: True: A [2]
6. Answer, LO6: True: A [2]
7. Answer, LO7: True: A [2]
8. Answer, LO8: True: A [2]
9. Answer, LO10: True: A [2]
10. Answer, LO10: True: A [2]

QUESTION 3: CASE STUDY [20]

1. Answer, LO1: This study aims to identify the impact of social media on children and young people [3]

2. Answer, LO3 (two marks each): [6]

Medline, Embase and PsycINFO databases

3. Answer: LO1/8/9: [3]

The studies identified that the health impact of social media on children and young people was greatest on mental health and specifically in the areas of self-esteem and well-being, with related issues around cyberbullying and 'Facebook Depression', with an association between the use of social media and self-esteem and body image.

4. Answer, LO1: [3]

There is a need that seeks to identify the risk of harm from social media and risk mitigation strategies to assist healthcare professionals in providing essential education for parents and young people.

5. Answer, LO1: (Answer may vary from one student to another) [2]
Impact of social media on the health of children and young people

QUESTION 4: [30]

1. Answer, LO3: [2]

A direct quotation is a phrase or paragraph or part of the original text which has been repeated verbatim. This is included within quotation marks " " followed by the author/s surname, year of publication and page number. The researcher should limit the amount of direct quotations in the write-up to less than 10% of total references.

2. Answer, LO5: [4]

Use quantitative research if you want to confirm or test something (a theory or hypothesis)

Use qualitative research if you want to understand something (concepts, thoughts, experiences)

3. Answer, LO6: [4]

Pre-experiment: "are called such because they often happen before a true experiment is conducted. Often, researchers want to see if their interventions will affect a small group of people before they seek funding and dedicate time to conduct a true experiment" (Pressbooks, 2021).

- Quasi-experiment: an experimental environment is artificial hence, it might not result in a true reflection. In this type, researchers try to set up the experiment but, in a real-life, natural setting. Quasi means "as if". The control and

experimental groups differ not only in terms of the experimental intervention they receive but also in other unknown or unknowable, ways. Thus, the researcher must try to statistically control for as many of these differences as possible. Because control is lacking in quasi-experiments, there may be several "rival hypotheses" competing with the experimental manipulation as explanations for observed results

4. Answer, LO7 (Any two, 2 marks each): [4]

- **Convenience sampling:** Available and willing participants are selected
- **Purposive sampling:** When there is a very specific set of characteristics for the sample
- **Quota sampling:** The population is divided into mutually exclusive sub-groups
- **Snowball sampling:** When there are very few participants that fit the required characteristics
- **Expert sampling:** Similar to purposive sampling, the difference is that the "experts" can alter the research

5. Answer, LO9 (Answer may vary from one student to another): [4]

H₀: students who spend more time doing tutorials on their laptops achieve higher marks

H₁: students who spend more time doing tutorials on their laptops do not achieve higher marks

6. Answer, LO10 (Any three, two marks each): [6]

- Could mean the end of a career as a researcher [2]
- Grounds for dismissal [2]
- Forfeiture of research grants [2]
- Blacklisted (e.g. reputable research organizations and universities refuse to hire; funding sources refuse to sponsor research work, journals refuse to consider any articles for publication) [2]
- Previously earned academic credentials taken away [2]

7. Answer, LO10: [6]

- i. Sensitive data
- ii. Personal data
- iii. Not personal data
