MID YEAR MAIN EXAMINATION QUESTION PAPER

XYZ Corporation, a global manufacturing company, is facing challenges in adapting to digital transformation trends and increasing competition in the industry. The company's traditional manufacturing processes are becoming outdated, leading to inefficiencies in production and supply chain management. Additionally, there is a growing demand for sustainable and eco-friendly products, prompting the need for innovation in product development and manufacturing practices.

To address these challenges and stay competitive in the market, XYZ Corporation decides to undergo a comprehensive organizational transformation.

Questions

1. How can XYZ Corporation effectively communicate the need for organizational transformation to its employees and stakeholders? (5)
2. What steps should XYZ Corporation take to identify and prioritize areas for improvement within its manufacturing processes and supply chain? (5)
3. How can XYZ Corporation foster a culture of innovation and sustainability to drive product development and manufacturing practices? (5)
4. What strategies should XYZ Corporation implement to ensure a smooth transition during the organizational transformation, minimizing disruptions to operations and employee morale? (5)

TOTAL MARKS: 70
